

Notification Form for Biocidal Products **Biocide Products by Type**

(Each biocide product notified should be identified as being of one or more of the following product types - see second item on page 1 of the notification form)

Type 1	Human hygiene biocidal products	biocidal products used for human hygiene purposes
Type 2	Private area and public health area disinfectants	products for disinfection of air, surfaces materials, equipment and furniture (excluding uses involving direct contact with food or feed), in private, public, and industrial areas including hospitals and algacides (e.g. use in swimming pools, aquaria, bathing and other waters, air conditioning systems, walls and floors, chemical toilets, waste water, hospital waste, soil or other substrates)
Type 3	Veterinary hygiene biocidal products	biocide products used for veterinary hygiene purposes including products used in areas in which animals are housed, kept or transported
Type 4	Food and Feed area disinfectants	products used for the disinfection of equipment, containers, consumption utensils, surfaces or pipework associated with the production, transport, storage or consumption of food, feed or drink (including drinking water) for humans and animals
Type 5	Drinking water disinfectants	products for disinfection of drinking water for humans and animals
Type 6	In-can preservatives	products for preservation of manufactured products other than foodstuffs or feedingstuffs, in containers, <i>via</i> control of microbial deterioration - to ensure shelf life
Type 7	Film preservatives	products used for the preservation of films or coatings by the control of microbial deterioration in order to protect the initial properties of the surface of materials or objects such as paints, plastics, sealants, wall adhesives, binders, papers, art works
Type 8	Wood preservatives	products used for the preservation of wood, from and including the saw-mill stage, or wood products by the control of wood-destroying or wood-disfiguring organisms (preventative and curative products)
Type 9	Fibre, leather, rubber and polymerised materials preservatives	products used for the preservation of fibrous or polymerised materials, such as leather, rubber or paper or textile products and rubber by the control of microbiological deterioration
Type 10	Masonry preservatives	products used for the preservation and remedial treatment of masonry or other construction materials other than wood by the control of microbiological and algal attack
Type 11	Preservatives for liquid -cooling and processing systems	products used for the preservation of water or other liquids used in cooling and processing systems by the control of harmful organisms such as microbes, algae and mussels - does not include products used for the preservation of drinking water
Type 12	Slimicides	products used for the prevention or control of slime growth on materials, equipment and structures, used in industrial processes e.g. on wood and paper pulp, porous sand strata in oil extraction

Type 13	Metalworking-fluid preservatives	products used for the preservation of metalworking fluids by the control of microbial deterioration
Type 14	Rodenticides	products used for the control of mice, rats or other rodents
Type 15	Avicides	products used for the control of birds
Type 16	Molluscicides	products used for the control of molluscs
Type 17	Piscicides	products used for the control of fish; these products exclude products for the treatment of fish diseases
Type 18	Insecticides, acaricides and products to control other arthropods	products used for the control of arthropods (<i>e.g.</i> insects, arachnids and crustaceans)
Type 19	Repellents and attractants	products used to control harmful organisms (invertebrates such as fleas, vertebrates such as birds), by repelling or attracting, including those that are used for human or veterinary hygiene either directly or indirectly
Type 20	Preservatives for food or feedstocks	products used for the preservation of food or feedstocks by the control of harmful organisms
Type 21	Antifouling products	products used to control the growth and settlement of fouling organisms (microbes and higher forms of plant or animal species) on vessels, aquaculture equipment or other structures used in water
Type 22	Embalming and taxidermist fluids	products used for the disinfection and preservation of human or animal corpses, or parts thereof
Type 23	Control of other vertebrates	products used for the control of vermin
