

PREMAZOR TURBO

Non-selective herbicide for weed control in non-crop areas (permeable surfaces overlying soil)

A Suspension Concentrate (SC) formulation containing 40g/L Diflufenican and 250g/L Glyphosate

WARNING

RISK AND SAFETY INFORMATION

Causes serious eye irritation

Very toxic to aquatic life with long lasting effects

Keep out of reach of children

Wash hands thoroughly after handling

Wear protective gloves/protective clothing/eye protection/face protection

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

If eye irritation persists: Get medical advice/attention

Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for triple rinsed empty containers which can be disposed of as non-hazardous waste

To avoid risks to human health and the environment, comply with the instructions for use.

Do not contaminate water with the product or its container (Do not clean application equipment near surface water / Avoid contamination via drains from farmyards and roads).

To protect aquatic organisms respect an unsprayed buffer zone of 2m to surface water bodies.

PCS no. 05673

IMPORTANT INFORMATION

FOR USE ONLY AS AN INDUSTRIAL HERBICIDE

Crop	Max single dose	Max. no. of applications	Max. total dose	Latest time of application
Non-crop areas (permeable surfaces overlying soil)	4.5 L/ha	1 per year	4.5 L/ha	End of July

Mix 45 mL product in 5-10 litres water to treat 100 m²

Other specific restrictions:

- To minimise spray drift the product must be applied using a drift reducing nozzle capable of producing a coarse quality spray (e.g. Hypro Lo-Drift 03 80 or equivalent).

- This product must not be applied to any non-porous man made surfaces.

- This product must not be applied through ultra-low volume or CDA applicators.

READ THE LABEL BEFORE USE, USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE.

PROTECT FROM FROST

SHAKE WELL BEFORE USE

PRODUCT IDENTITY

PREMAZOR TURBO is a non-selective herbicide designed to control weed in permanently pervious uncultivated land. Thanks to both active ingredients that it contains, PREMAZOR TURBO destroys the existing weed (annual and perennial dicotyledons and grasses) and prevents the germination of new weed. Use preferably from the beginning of March until the end of June. For optimal results, apply on dry foliage, moist soil, in calm weather and when no rain is expected within the 6 or 7 hours following the treatment.

SAFETY PRECAUTIONS

OPERATOR PROTECTION

Engineering control of operator exposure must be used where reasonably practical in addition to the following personal protective equipment:

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS) AND GLOVES when handling the concentrate.

WEAR SUITABLE PROTECTIVE GLOVES AND COVERALLS when applying by hand-held equipment.

WASH HANDS AND EXPOSED SKIN before eating and drinking after work.

WHEN USING, DO NOT DRINK, EAT OR SMOKE.

IF SWALLOWED, seek medical advice immediately and show this container or label.

IF YOU FEEL UNWELL, seek medical advice immediately and show this container or label.

IN CASE OF CONTACT WITH EYES, RINSE IMMEDIATELY with plenty of water and seek medical attention.

ENVIRONMENTAL PROTECTION

Do not contaminate water with the product or its container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

STORAGE AND DISPOSAL

KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDINGSTUFFS.

KEEP OUT OF REACH OF CHILDREN.

KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.

EMPTY CONTAINER COMPLETELY and dispose of safely.

PROTECT FROM FROST

RINSE CONTAINER THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add washings to sprayer at time of filling and dispose of container safely/dispose of container. DO NOT RE-USE CONTAINER for any purpose.

MEDICAL ADVICE

In case of accidental contact or splashes, wash immediately. In case of irritation or faintness call a doctor (if possible show him the label).

DIRECTIONS FOR USE

IMPORTANT: This information is authorised as part of the product label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

RESTRICTIONS

PREMAZOR TURBO should be used on pervious zones only.

Avoid spray drifts towards non-crop plants outside the target area. The PREMAZOR TURBO formulation should not be directed towards the green parts of the plants to be preserved. Therefore it is recommended to use an herbicide spray shield nearby the hedges, flowerbeds, rosebushes and shrubs and to avoid accidental spraying onto the neighbouring cultures.

Do not apply in close proximity to flowers and bulbs (risk of splashes). Look at the weather forecast of your region and choose a mild day without wind or rain. The foliage to reach must be dry. Do not treat above 25°C.

WEEDS CONTROLLED

PREMAZOR TURBO is effective against a range of annual and perennial broad-leaved and grass weeds:

Redroot pigweed, artemisia, atriplex, selfheal, shepherd's purse, cerastium, poppy, crepis, crabgrass, epilobium, horseweed, fescue, wild oat, cleavers, geranium, sow thistle, nipplewort, birdsfoot trefoil, black medick, horse-gowan, forget-me-not, dioecious nettle, parsnip, annual bluegrass, hawkweed, ox-tongue, dandelion, plantain, cat's ear, lollum, knot grass, sorrel, groundsel, tansy ragwort, sandwort, pearlwort, stellaria, clover, speedwell, vetch grass (those are the main sensitive species, also refer to the data sheet).

PREMAZOR TURBO is used on the pervious zones planted or not with straight line hedges; pathways of parks and gardens, beaten hearth sidewalks, sandy or broken-gravel loams, made of "raw coal", of coarse sand.

CROP SPECIFIC INFORMATION

PREMAZOR TURBO may be used in the early season, on young adventitious plants in full growth. Early application enables to get a durably clean soil thanks to the extended performance of the diflufenican, which limits the number of herbicides interventions in the year.

PREMAZOR TURBO is applied by spraying, after dilution in water. The treatment may be carried out with a handheld or knapsack sprayer equipped with drift reducing nozzle (e.g. Hypro Lo-Drift 03 80 or equivalent) by trying to spray the product evenly on the surfaces to be weeded: 500 to 1000 L of spray mixture with a spray lance (i.e. 5 to 10 litres per 100 m²).

The application of PREMAZOR TURBO enables to control the plants over a long period of time. However in case of especially hard conditions it may be necessary to "touch-up" some late-emerging perennial plants, grasses or dicotyledons. In such case use a weed-killer with authorized foliar penetration.

Review the data sheets of those products to adjust the dose to the situation encountered.

MIXING

Use a spraying equipment in good condition and regularly checked. Prepare only the amount of mixture necessary to the treatment of the surface area so as to avoid the tedious disposal of excesses.

Fill the sprayer tank up to ¾ full of water. Stir the can and pour the necessary dose of PREMAZOR TURBO. Fill completely then start the agitator. Maintain the agitation throughout the treatment.
