ΠΕΧ

An emulsifiable concentrate (EC) formulation containing 250 g/L trinexapac-ethyl for use as a plant growth regulator on winter wheat, winter barley and spring barley.

5 lt

READ THE LABEL CAREFULLY BEFORE USE

NEXT is plant growth regulator intended to be used on Winter wheat, Winter and Spring barley.

INSTRUCTIONS FOR USE:

| Crop | dose | Max. no. of applications | Max. total dose | Latest time of application |
|---------------|----------|--------------------------|-----------------|--|
| Winter wheat | 0.5 L/ha | | 0.5 L/ha/crop | Flag leaf stage: flag leaf fully unrolled, ligule just visible (BBCH 39) |
| Winter barley | 0.8 L/ha | - | 0.8 L/ha/crop | Flag leaf stage: flag leaf fully unrolled, ligule just visible (BBCH 39) |
| Spring barley | 0.6 L/ha | - | 0.6 L/ha/crop | Flag leaf stage: flag leaf fully unrolled, ligule just visible (BBCH 39) |

Max. no of applications: 1 per season (single rate can be split into two applications, with total dose not exceeding the maximum total dose stated in the table above).

Apply in 200-400 L water/ha using tractor mounted/trailed sprayer.

MIXING, APPLICATION AND CLEANING:

Never prepare more spray solution than required. When preparing the mixture, half fill the tank with clean water and start the agitation. Pour the recommended concentration of product into the tank and then continue filling with water to reach desired spray volume.

All application equipment and contaminated protective clothing should be washed/cleaned with water or a dilute detergent solution and thoroughly rinsed. Care should be taken not to contaminate watercourses with the contaminated washings. Contaminated cleaning liquids should be disposed of safely according to local regulations.

Avoid spillage. In case of spillage, remove spilled clothes and wash skin immediately.

Clean equipment immediately after use with a spray tank cleaner. Empty container and rinse with an integrated pressure rinsing device or manually rinsing three times.
