Lumiposa®
INSECTICIDE

PCS No. 06257

A flowable concentrate formulation for seed treatment (FS) of winter sown oilseed rape containing 625g/l cyantraniliprole, for the reduction of damage to seedlings caused by early attacks of Cabbage stem flea beetle, Flea beetle, Cabbage root fly and Turnip sawfly.

SAFETY PRECAUTIONS

OPERATOR PROTECTION
WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS) AND SUITABLE PROTECTIVE GLOVES when handling the concentrate, treated seed, calibrating or cleaning machinery, and when handling contaminated surfaces or dealing with spillages.

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND SUITABLE RESPIRATORY PROTECTIVE EQUIPMENT (disposable filtering facepiece respirator to EN 149 FFP2(S) or equivalent) when bagging seed.

WASH HANDS AND EXPOSED SKIN after cleaning and re-calibrating equipment.

WASH HANDS AND EXPOSED SKIN before meals and after work.

ENVIRONMENTAL PROTECTION
The seed coating shall only be performed in professional seed treatment facilities. Those facilities must apply the best available techniques in order to ensure that the release of dust during application to the seed, storage and transport can be minimized.

DO NOT CONTAMINATE SURFACE WATERS OR DITCHES with chemical or used container.

Dispose of contents/container to a licensed hazardous waste contractor or collection site except for triple rinsed containers which can be disposed of as non-hazardous waste

Use appropriate containment to avoid environmental contamination.

STORAGE AND DISPOSAL
KEEP OUT OF THE REACH OF CHILDREN
KEEP AWAY FROM food, DRINK AND ANIMAL FEEDING STUFFS

DO NOT RE-USE CONTAINER for any purpose.

LABEL TREATED SEED with the appropriate precautions using printed sacks, labels or tags bags

IMPORTANT INFORMATION
FOR USE ONLY AS A PROFESSIONAL SEED TREATMENT
Crops: Winter oilseed rape
Maximum individual dose: 8 ml per 100,000 seeds
Maximum number of treatments: 1 per crop
Latest time of application: Before drilling
Other specific restrictions: LUMIPOSA may only be applied every third year on the same field.

A maximum seeding rate of 500,000 seeds/ha must not be exceeded.

Treated seeds should not be fed to livestock.

READ THE LABEL BEFORE USE. USING THIS LABEL IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

DIRECTIONS FOR USE
IMPOSSIBLE for proper operation is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

Application
LUMIPOSA™ may only be applied using calibrated seed treatment equipment. Treatment equipment must be clean and free of previous pesticide deposits before applying LUMIPOSA. Add undiluted LUMIPOSA to the mixing tank.

Treatment should be stored in a cool, dry, ventilated environment. Avoid prolonged exposure above 40°C and do not subject to temperatures below freezing. Ideally, treated seed should be used in the season of treatment. It is not recommended to store LUMIPOSA treated seed for longer than 18 months.

Rate of use
Apply LUMIPOSA at 8ml per 100,000 seeds
Do not exceed a sowing rate of 500,000 seeds/ha.

Application
LUMIPOSA™ may only be applied using calibrated seed treatment equipment. Treatment equipment must be clean and free of previous pesticide deposits before applying LUMIPOSA. Add undiluted LUMIPOSA to the mixing tank.

Application to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticides).

Best practices for resistance management of Group 28 insecticides include:

• Avoid using the same mode of action (same IRAC group number) on consecutive generations of insect pests.

• Application to the next generation of target pest(s) must be with an effective product with a different mode of action (non-Group 28 insecticides).

• Target the most susceptible insect life stages, whenever possible.

• Monitor insect populations for product effectiveness.

If resistance to this product develops in your area, this product, or other products with a similar mode of action, may not provide adequate control. If poor performance cannot be attributed to improper application or extreme weather conditions, a resistant strain of insect may be present. If you experience difficulty with control and resistance is a reasonable cause, immediately consult your local agronomist or specialist advisor for the best alternative mode of control.

Crop Specific information
LUMIPOSA™ may be used on all varieties of winter oilseed rape. Treatment should be carried out as near to drilling as possible.

Storage
TO PROTECT BIRDS/WILD MAMMALS, treated seed should not be left on the soil surface. Bury or remove spillages

DO NOT APPLY TREATED SEED FROM THE DRAIN.

The seed coating shall only be performed in professional seed treatment facilities. Those facilities must apply the best available techniques in order to ensure that the release of dust during application to the seed, storage and transport can be minimized.

Ideally, treated seed should be used in the season of treatment. It is not recommended to store LUMIPOSA treated seed for longer than 18 months.

Seed quality
Do not use on cracked or damaged seed. Use only good quality seed tested for viability using a suitable germination test before treatment.

Seed spillages
In case of seed spillage, clean up as much as possible into the related seed sack and re-use. Bury or remove the remainder completely.

NOTICE TO BUYER
All goods supplied by us are of a high grade and we believe them to be suitable for any purpose for which we expressly supply them, but as we cannot exercise control over their mixing or use, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accept-

ised by us for any damage or injury whatsoever arising from their storage, handling, application or use.
