

Turret[®]60

FUNGICIDE

® registered trademark of Globachem

A fungicide for the control of a wide range of triticale, rye and oil ad rape and a spring wheat, durum wheat, winter and spring barley, triticale, rye and oil ad rape.

An emulsifiable concentrate containing 60 g/L of mr unazole (6.7 % /w)

RICK AND SAFETY INFORMATION

Flammable liquid and spour Causes serious eye dan. 'e.

Causes serious eye dannee.

Causes skin irrit

May cause an illergi kin reaction.

May Lotatal Lower own and enters airways.

May cause respir tory initation.

Susproces of danner of the unborn child.

Very oxic to a valid life with long lasting effects.

Keep a. . . frc. . heat. — No smoking. Wear protective gloves, eye protection, face protection.

IF SWALLOWED: Immediately call a POISON CENTER or doctor / physician.

NOT induce vomiting.

IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if resent and easy to do. Continue rinsing.

If skin irritation or rash occurs: Get medical advice / attention.

Dispose of contents / container to a licensed hazardous waste disposal contractor or collection site except for triple rinsed empty containers which can be disposed of as non-hazardous waste.

Do not contaminate water with the product or its container.

(Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads)

To protect aquatic organisms respect an unsprayed buffer zone of 5m to surface water

To avoid risks to human health to the environment, comply with the instructions for use.

PCS no. 06384

GENERAL INFORMATION

TURRET 60 is a broad spectrum fungicide with curative and protectant activity, which can be used on all commercial varieties of winter and spring wheat, durum wheat, winter and spring barley, triticale and rye. TURRET 60 can also be used on oilseed rape. When applied to oilseed rape in the spring, TURRET 60 can provide plant growth regulation in the form of a reduction in crop height.

RESTRICTIONS / WARNINGS

Do not apply to oilseed rape crops that are damaged or stressed from factors uch as previous product use, adverse weather conditions (e.g. drought, frost or waterlogging), nutrient deficiency or pest at cks.

TURRET 60 is formulated specifically for use on oilseed rape. The accition of further adjuvants is not advised.

TURRET 60 should not be applied with pyrethroids to flow.

Ensure the sprayer is free from previous chemical residues that any harm the crop. Use of a detergent cleaner is advised before and after use. Avoid spray drift on to neighbouring crops and field margins.

CROP RECOMMENDATIONS

Cereals

TURRET 60 is a broad spectrum. agicio. with a live and protect, tact, ity inic can be used on all commercial varieties of winter and spring wheat, durum wheat which will be spring wheat, durum wheat winter and spring wheat, durum wheat winter and spring wheat, durum wheat which will be spring wheat, durum wheat which will be spring which which will be spring which will be spring which which will be spring which which will be spring which will be spri

	Yheat	Barley	Triticale	Rye

Powdery Mildew (Blumeric graminis)	MC	MC	MC	MC
Fu arium Ear blight	R	-	R	-

C = f is control n = reduction

MC = mo eratr control

Time of app" catio

Apply as so in as ciseases start to develop in the crop and repeat as required.

Application at an early stige of mildew development (not more than 3% infection on any green leaf) will give moderate control. Where mildew has become established, the use of a specific mildewicide will improve control and help prevent the development of resistant strains.

PAGE 4

For optimum results on yellow rust apply before any leaf has more than 1% infection or as a preventative treatment on susceptible varieties after the flag leaf has fully emerged (GS 39).

Good reduction of ear Fusarium may be achieved when applied between full ear emergence and anthesis complete (GS 69).

For control of brown rust treat susceptible varieties as soon as rust is seen and spray more resistant varieties before any of the top three leaves have more than 1-2% infection.

Spray as soon as net blotch is seen on any of the top three leaves. A further treatment will be necessary where disease is well established

Rate of Application

1.5 L/ha

Oilseed rape

All varieties of oilseed rape may be treated.

Disease control

TURRET 60 provides control of Alternaria, and a reflection of phoma leaf spot, phoma strate, ker (Phoma lingam) and light leaf spot.

	Alternari	Phoma leaf spot 2. rhot 2 stem anker (Phon.a. "ingan.)	Light leaf spot
Oilseed rape	antrol	n ductio	Reduction

Time of application

Apply as soon as diseaser star

Rate of application

1.2 L/ha.

Crop heigh eductin

When applied to be edirection in the spring, TURRET can ovide plant growth regulation in the form of a reduction in crop height.

Tim of app ation

App., during stem extension in the spin once the oilseed rape crop is actively growing (GS 31-51)

Hate of a, Vication

LULLOWING CROP

After treating a cere of or oilse of rape crop with TURRET 60, the crops listed below may be sown as a following crop: Beans Oilseed rape Ryegrass Clover

Sugar beet Sunflower

Cabbage Lettuce Onions Carrots Linseed Peas Cereals Maize Potatoes The effects of TURRET 60 on other crops has not been assessed.

WATER VOLUMES

In cereals apply TURRET 60 in 200 to 300 L/ha water

In oilseed rape apply TURRET 60 in 200-400 L/ha water.

Apply as a MEDIUM spray, as defined by BCPC. In dense crops use the higher volume to achieve adequate penetration and good coverage

To ensure optimum spray coverage and minimize spray drift, adj. t the spray boom to the appropriate height above the crop, according to guidance provided by the sprayer and/or nozzle manufacture.

Sprayers should be thoroughly cleaned out immediately af

Qualified approval

TURRET 60 may be applied in reduced water volve set as secified in the table below, although efficacy at this reduced volume has not been evaluated. Application of this product at reduced-velocity is at unor's risk with regard to piological efficacy.

Crop	R:	Minimum water volume
Winter wheat, spring wheat, durum beat, will ter	1-5 L/ha	110 L/ha
barley, spring barley, triticale, rye		
Oilseed rape	7.2 L/ ia	90 L/ha

MIXING AND APPLICA ON

Three quarters fi' the tail with wa' if and start the agitation. To ensure thorough mixing of the product, invert the container several times before opening. Add the required quantity of TURRET 50 to the spray tank while re-circulating. Fill up the tank with water and continue agitation until 'ora' lig is completed.

On emment the container, rinse container thoroug by by an integrated pressure rinsing device or manually rinsing three times. Add war ings to pray " at time of filling and dispose container safely.

TANK C. FANING PROCED 'RE

to avo | subsequent injury | crop | other than cereals, all spraying equipment must be thoroughly cleaned after use. Rinse the tank three times with clean water and spray to e further diluted rest onto the target crop.

RESISTAL. TURRET 6 conta is metconazole, a DMI fungicide. Resistance to some DMI fungicides has been identified in Septoria leaf blotch (Mycosphaerella c amir lola) which may seriously affect the performance of some products. For further advice on resistance management in DMIs contact year agronomist or specialist advisor.

Cereal Powdery mildew strains with decreased sensitivity to triazoles are common. Where these occur or develop, TURRET 60 may not give satisfactory control.

For crop/pathogen situations where repeated spray applications are required, alternation or mixtures with an effective non cross-resistant fungicide are recommended. Fungicide use does not replace the need for nonchemical cultural control methods e.g. resistant crop varieties, good agronomic practice, plant hygiene.

CONDITIONS OF SUPPLY

All goods supplied by us are of high grade and we believe them to be suitable by a swe cannot exercise control over their storage, handling, mixing or use, or the weather conditions before, during or after ap, "ication which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality or fitness in any purpose of our goods are excluded.
