#### SAFETY PRECAUTIONS

Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS). RUBBER BOOTS, SUITABLE

PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the concentrate.

WEAR SUITABLE PROTECTIVE GLOVES when handling contaminated surfaces or applying the product.

WASH CONCENTRATE from skin or eyes immediately DO NOT BREATHE SPRAY

WHEN USING DO NOT EAT, DRINK OR SMOKE

WASH HANDS AND EXPOSED SKIN before meals and after work IF YOU FEEL UNWELL, seek medical advice immediately (show the label where possible).

#### **Environmental protection**

Do not contaminate water with the product or its contained (Do not clean application equipment near surface water/A hid contamination via drains from farmyards and road ,. To protect aquatic organisms respect an unspriced buffer zone or 4m to surface water bodies.

#### Storage and disposal

KEEP AWAY FROM FOOD, DRINK A D ANIM L FEEDING STUFFS KEEP IN ORIGINAL CONTAINER, tight of sed, in a safe place KEEP OUT OF REACH OF CHILDREN

EMPTY CONTAINER COMPLETELY and dispose of safely

DO NOT RE-USE CONTAINER for any purpose.

MANDATORY REQUIREMENT: THIS AREA MUST BE BLANK (for 2D Data Matrix, Lot Nr., Manufacturing Date ...)

# NINGICIDE

# PCS 06766

Zorvec Latect. M is a Juspo emulsion formulation containing 240 g/L amisulbrun, and 10 g/L oxathiapiprolin for the control of late blight in notatoes.

ROUP 21 49 FUNGICIDES

WARNING

#### DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

# RESTRICTIONS

Use in sequence of no more than 3 consecutive applications, or in alternation with a different mode of

Apply preventively before first visible signs of disease, using a 7 to 10-day spray interval. Use short interval in case of high disease pressure.

A minimum interval of 7 days between applications must be observed.

### DISEASE CONTROL

Zorvec Entecta™ should be used as part of a season long programme of correctly timed sprays Where a fungicide with a different mode of action, ollow Zorvec Entecta™ oplication(s), this fungicide commencing before disease infection. When used as a preventative treatment. Zorvec Entecta™ gives control of late blight caused by *Phythophora infestans*. Products from the same chemical group with

There will be no more than six applications of ox chiapiprolin per part on the same acreage, targeting similar mode of action to oxathiapiprolin must not be applied for more than 1/3 of total applications in the same pathogen. the season, or 3 to 4 applications depending on the crop, whichever is the more restrictive.

According to Good Agricultural Practice, Zorvec Entecta™ should be applied on dry foliage. Use sufficient water to obtain thorough, uniform crop coverage.

Apply preventatively before the first visible signs of disease in the crop. Commence treatment with ZORVEC ENTECTA at the first blight warning or when local weather conditions are favourable for disease development. Applications should be repeated at 7-10 day spray intervals depending on disease pressure. As disease pressure increases, the interval should be shortened.

#### RESISTANCE

Repeated use of products for control of specific plant pathogens may lead to the selection of resistant strains of fungi and result in a reduction of disease control. A disease management program that includes rotation and/or applying mixtures of fungicides with different effective modes of action is essential to reduce the risk of fungicide resistance development.

The mode of action of oxathiapiprolin, one of the active ingredients in Zorvec Entecta™, is novel and has been assigned the FRAC code 49. Oxathiapiprolin inhibits an oxysterol binding protein (OSBP)

Amisulbrom, the other active ingredient, is a Qil-fungicide (Quinone inside In, bitors). This group is considered to be medium to high risk for resistance.

The following restrictions apply to the use of Zorvec Entecta™ or any the secondarining

Exposure to Zorvec Entecta™ should not exceed thirty-three pc cent 33%) of the total period protection needed per crop.

For potatoes when three (3) or more fungicide applications are 1 a. 2, us \_orvec Entecta™ 1, no 1, or ... than 33% of the total number of fungicide applications 3.5 a maxinum of four (4) a prication of per crop. Where less than three (3) funcicide applications, re.p., de ..., re no more than or 1(1) a alication of Zorvec Entecta™.

Zorvec Entecta™ applications are to be made pr ventively an 'no more than thret (3) tin as in sequence before applying a fungicide with a different mo e of action.

preferably should have curative activity

For guidance on a particular rop and disease control is ruation, consult your agronomist, crop protection specialist or Council Aurscience.

### WATER VOLUME AND APPLICATION

Apply ZORVEC ENTECTA in at least 200 L water/hectare using a MEDIUM quality spray (as defined by BCPC) to give good even coverage of the crop. Higher water volumes should be used in dense crops to improve coverage.

## COMPATIBILITY

For details on compatibilities contact your distributor or Corteva technical hotline on +44 (0) 800 689 8899 or ukhotline@corteva.com

Zorvec Entecta<sup>™</sup> is compatible with a range of fungicides and insecticides.

#### SPRAY TANK CLEANING

Immediately after application, completely drain spray equipment Thoroughly rinse sprayer and flush the hoses, boom nozzles with clean water.

Loosen and physically remove visible deposits.

Remove and clean nozzles, screens and strainers.

Flush the entire system with clean water.

Take all necessary safety precautions when cleaning equipment.

Do not clean near wells or water sources.

Consult label tank cleanup procedures for all tank-mix partners and be sure to use the most rigorous procedure recommended

Dispose of waste rinse water in accordance with local regulations.
