INTRODUCTION

This book contains the list of plant protection products that may be placed on the market and used in accordance with the European Communities (Authorization, Placing on the Market, Use and Control of Plant Protection Products) Regulations 2003 ¹ The products listed are those that on 1 January 2005, had been registered, i.e. had been authorized, cleared, notified or granted permission to market, in accordance with the Regulations. The list also includes products for which a parallel import approval has been issued.

Legislation has been introduced to regulate Biocides, including wood preservatives, rodenticides, antifouling paints, disinfectants and other such products. Pending the compilation of the Official register of Biocidal products the listing of products included in this book is confined to plant protection products.

A brief outline of the new regulatory system for biocidal products may be found on page *vii*.

Chapter 1 contains an alphabetical listing of the plant protection products registered on 1 January 2005. For each product, the following information is provided -

- ◆ its authorization, clearance, notification or permission to market number,
- ◆ the holder of the authorization, clearance, notification or permission to market,
- ◆ the marketing company
- ◆ the function of the product (*e.g.* herbicide, fungicide *etc.*),
- ◆ its formulation type (*e.g.* WP – wettable powder, EC – emulsifiable concentrate),
- ◆ the identity and content of each active substance in the product

¹ S.I. No. 83 of 2003, S.I. No. 357 of 2003, and S.I. No. 702 of 2003, S.I. No. 197 of 2004, S.I. No. 580 of 2004, S.I. No. 581 of 2004, S.I. No. 650 of 2004 and S.I. No. 651 of 2004.

Chapter 2 contains a list of the plant protection products for which a name change was accepted during 2004. Both the former and current names are provided.

Chapter 3 contains a list of the plant protection products for which authorization, clearance, notification or permission to market, as appropriate, has expired or has been rescinded during 2004.

Chapter 4 contains a list of some plant protection products for which authorization, clearance, notification or permission to market, as appropriate, has been rescinded and for which the period specified for use of remaining stocks will expire during 2005. The list contains the date of revocation of the registration and the date from which the use of the product will be illegal. Stocks of any of these products at wholesale or retail level after the registration revocation date or at user level after the use by date must be disposed of in an appropriate manner.

Chapter 5 contains a list of active substances prohibited for marketing and use for plant protection in accordance with the European Communities (Prohibition of Certain Active Substances in Plant Protection Products) Regulations, 1981 to 1990 ², and the Poisons (Prohibition of the Use of Certain Substances for Agricultural Purposes) Regulations, 1991 ³.

Chapter 6 contains a list of Active Substances that have been included in Annex I of 91/414/EC as at 1/1/05.

Chapter 7 contains a list of Active Substances that have been refused inclusion in Annex I of 91/414/EC as at 1/1/05.

The list of companies holding authorization, clearance, notification or permission to market for products listed in this book or that are responsible for the marketing of those products, together with their addresses, and, where available, telephone and tele-facsimile numbers are provided in Chapter 8.

Chapter 9 consists of an index of all products on the market on 2 January 2005, arranged by active substance.

² S.I. No. 320 of 1981, S.I. No. 237 of 1985, S.I. No. 342 of 1987 and S.I. No. 339 of 1990

³ S.I. No. 361 of 1991

Chapter 10 consists of an alphabetical list of adjuvants that on 2 January 2005 were included on the product register.

This publication is issued for the guidance of the reader. While every effort has been made to ensure that the information provided is complete and accurate, it must not be construed as being a definitive statement of the pesticide products that can be marketed or used.

The formal register of plant protection products that may be marketed and used is dynamic in nature. In cases of doubt, readers are advised to contact the

LEGISLATION

Current statutory provisions ⁴ require that prior to their marketing and use, plant protection products (PPP's) are authorized to ensure a high level of protection for humans, for animals and for the environment. The health of those handling PPPs as well as that of consumers, depend on their being used in accordance with label instructions, which, where relevant, include precautions to prevent damage to health or to the environment. In the case of plant protection products evaluated since 1 October 1994, their effectiveness and safety to crops is also evaluated as part of the authorization process.

PPPs offered for sale are inspected at both wholesale and retail distribution levels, to ensure that they have been authorized, notified or granted a permission to market, in accordance with the legislation and to ensure that they are correctly packaged and labelled. In addition PPPs are sampled for subsequent analysis, to ensure that the products sold or supplied conform with the specification of the product authorized, notified or granted permission to market. The inspection programme undertaken also includes inspections at farm level, and inspections of other end user's premises.

Agricultural produce offered for sale is routinely sampled and analyzed for its pesticide residue content. Produce found to contain residues exceeding Maximum Residue Levels (MRLs) may be destroyed at the owner's expense and without payment of compensation. In accordance with the relevant statutory provisions ⁵, offenders are liable to imprisonment, to being fined or to

⁴ See Footnotes 1 and 2

⁵ Fruit and vegetables: S.I. No 105 of 1989, S.I. No. 189 of 1994, S.I. No. 218 of 1997, S.I. No. 563 of 1998, S.I. No. 461 of 2000, S.I. No. 136 of 2001, S.I. No. 526 of 2002, S.I. No. 356 of 2003, S.I. No. 120 of 2004

Cereals: S.I. No. 181 of 1999, S.I. No. 459 of 1999, S.I. No. 459 of 2000, S.I. No. 250 of 2001, S.I. No. 138 of 2001, S.I. No. 622 of 2001, S.I. No. 533 of 2002, S.I. No. 272 of 2003, S.I. No. 386 of 2003, S.I. No. 119 of 2004, S.I. No. 240 of 2004, S.I. No. 576 of 2004.

Food of animal origin: S.I. No. 180 of 1999, S.I. No. 460 of 1999, S.I. No. 460 of 2000, S.I. No. 137 of 2001, S.I. No. 249 of 2001, S.I. No. 620 of 2001, S.I. No. 270 of 2003, S.I. No. 385 of 2003, S.I. No. 118 of 2004, S.I. No. 239 of 2004, S.I. No. 577 of 2004

Products of plant origin including fruit and vegetables: S.I. No. 179 of 1999, S.I. No. 458 of 1999, S.I. No. 461 of 2000, S.I. No. 462 of 2000, S.I. No. 139 of 2001, S.I.No.256 of 2001, S.I. No. 621 of

both. The presence of excessive residues is indicative of misuse of the PPPs concerned. The immediate and long term health risks for consumers exposed to such residues are well established.

It should be noted that although the authorization system in place for plant protection products includes the consideration of the performance of products, in terms of their effectiveness and safety to crops, such evaluations have only been completed for plant protection products authorized since 1 October 1994. Notified and cleared plant protection products, or those granted a permission to market, at an earlier date have not been checked, by the Pesticide Control Service of the Department of Agriculture and Food with regard to their effectiveness for the purpose intended.

Users of plant protection products, are reminded that label instructions concerning the handling of PPPs and the use of protective clothing and equipment, must be carefully followed to avoid damage to the health of those concerned with their use. The adherence to label instructions concerning rates and timing of applications is essential to ensure that consumers are not at risk from the presence of excessive residues in treated crops. It is especially important that the prescribed intervals between last application and harvest be observed. Strict adherence to label instructions relating to method and manner of use and relating to the disposal of packaging is necessary to avoid contamination of the environment and to prevent damage to wildlife.

The use of plant protection products in a manner other than that provided for on product labels is an offence that is subject to prosecution.

Only PPPs included in the formal register maintained by the Pesticide Control Service of the Department of Agriculture and Food may be sold. However stocks of PPPs for which the relevant authorization, clearance, notification or

2001, S.I. No. 535 of 2002, S.I. No. 271 of 2003, S.I. No. 384 of 2003, S.I. No. 134 of 2004, S.I. No. 231 of 2004, S.I. No. 579 of 2004.

permission to market has been recently withdrawn may still be available in some retail outlets. Retail distributors are advised to dispose of such stocks as soon as possible either through sale or safe disposal.

Information on Biocidal Products

Explanatory note:

The Regulatory system for biocides was established following the introduction of Council Directive 98/8/EC to control the placing on the market and use of biocidal products in the European Union. The objective of the Directive is to ensure that all biocidal products will be rigorously evaluated prior to being offered for sale to ensure that when used they are safe for man, animals and the environment.

A biocide is **defined** as any “active substances and preparations containing one or more active substances, put up in the form in which they are supplied to the user, intended to destroy, deter, render harmless, prevent the action of, or otherwise exert a controlling effect on any harmful organism by chemical or biological means.”

Implementation of the legislation.

The Pesticide Control Service of the Department of Agriculture and Food was designated, in July 2001, as the competent authority for the implementation of the legislation. Directive 98/8/EC has been transposed into Irish law by Statutory Instrument S.I. No. 625 of 2001 - European Communities (Authorization, Placing on the Market, Use and Control of Biocidal Products) Regulations, 2001.

A programme to identify all biocidal products being placed on the market in Ireland has been put in place as a first step in implementing this legislation. This programme involved the ‘Notification’ of basic information on biocidal products to the Pesticide Control Service (PCS). This allows the PCS to compile all the technical information necessary to identify biocidal products being placed on the market in Ireland. This ‘Notification’ process is now nearing completion and a register of products notified for marketing and use in Ireland is being compiled.

It is the responsibility of any company that markets a biocidal product to ensure that all of the data required as part of the notification process is

submitted to the Pesticide Control Service, either by themselves or by another company acting on their behalf.

Information submitted to the PCS as part of the notification process should be addressed to the

**Regulatory and Enforcement Unit,
Pesticide Control Service,
Department of Agriculture and Food,
Abbotstown,
Castleknock,
Dublin 15,**

Queries concerning the legislation and its implementation may be addressed to the Regulatory and Enforcement Unit of the Pesticide Control Service.

SEARCH options on PCS website at - www.pcs.agriculture.gov.ie

Three different search options are provided (it may take a few seconds for the search screen to load).

Search by Product Name – the drop-down box contains a list of all the plant protection products currently registered with PCS. Use the Scroll Button to move down through the list, which is in alphabetical order. You can type the first letter of a name into the drop-down box to move quickly to items that have names beginning with that letter. Clicking the “Find Product” button on the right will give details of the product that is currently in the drop-down box.

PRODUCT SEARCH		Scroll Button
Search by Product Name		
Product No. 1	▽	Find Product

Search by Active Substance – the drop-down box contains a list of the active substances in currently registered products. Clicking the “List Products” button will give a list of the products that contain the active substance currently in the drop-down box. It should be noted that the products listed may also contain other active substances.

Search by Active Substance		
Active Substance No. 1	△	List Products

Search by Function/Crop – three sub-options are provided; click on the radio button above the drop-down box to choose the option you require. Clicking the “List Products” button will give a list of the products associated with the selected Function and/or Crop e.g. if the “Search by Function AND Crop” radio button is selected and the “Function Box” contains ‘Fungicide’ and the “Crop” box contains “Barley – spring’ then a list of all fungicide products for spring barley is produced. If the “Search by Function only” button were selected, a list of all registered fungicide products would be produced. If the “Search by Crop only” radio button were selected, a list of all products that can be used on spring barley would be produced.

Chapter 5

Prohibited Active Substances

LIST OF ACTIVE SUBSTANCES BANNED IN IRELAND AS AT 31 DECEMBER 2004

<u>Active Substance</u>	<u>Date of First Ban</u>	<u>Active Substance</u>	<u>Date of First Ban</u>
Aldrin	1988	Hexachlorbenzene	1981
Binapacryl	1991	Maleic Hydrazide, and its salts, other than its choline, potassium and sodium salts	1991
Campechlor	1985	Maleic Hydrazide choline, potassium and sodium salts containing more than 1 mg/kg of free hydrazide expressed on the basis of the acid equivalent	1991
Captafol	1991		
Chlordane	1992		
Chlordecone	1992	Mercury Compounds	
Cyhexatin	1988	- Alkyl mercury compounds	1981
DDT	1985	- Alkoxyethyl and aryl mercury compounds	1991
Dicofol , containing less than 78% of p,p ¹ - dicofol or more than 1 g/kg DDT and DDT related compounds	1991	- Mercuric oxide	1991
Dieldrin	1981	- Mercurous chloride (calomel)	1991
Dinocap	1988	- Other inorganic Mercury Compounds	1981
Dinoseb, its acetate and salts	1991	Nitrofen	1988
Endrin	1981	1,2-Dibromoethane	1988
Ethylene oxide	1988	1,2-Dichloroethane	1988
HCH, containing less than 99.0% of the gamma isomer	1981	Quintozene, containing more than 1 g/kg of HCB or more than 10 g/kg pentachlorobenzene	1991
Heptachlor	1981	Reserprine	1992
		Strychnine, its salts and quaternary compounds	1992
		2,4,5-T	1988

Chapter 6

**Active Substances that have been included in
Annex I of EC Directive 91/414 up to 1/1/05**

Active Substances that have been included in Annex 1 of EC Directive 91/414 up to 1/1/05

<u>Substance</u>	<u>Date of Decision</u>	<u>Reference</u>
