

Instructions for workshop.

Please note that these documents were generated for the purpose of demonstrating the necessary checks to determine if a product should be notified, authorised or other. Some information is not factual but accept all information as it is presented to be true and correct for the purposed of this exercise.

1 - Open document 3A with examples.

2 – Open document 3B with extracts from Art 95, review programme, Biocidal products register and definitions of product types

3 – open the question sheet 3C and go through the questions in order using the examples in 3A and the supplementary information in 3B to answer the questions

4 – compare your answers against the answer sheet in 3D. You can also view the presentation to see information on where the answers came from. The presentation also includes a number of additional examples that are not included in the example document.
