Fungicide
A broad spectrum systemic fungicide with protectant and curative properties for use on Brussels sprouts, cabbage, broccoli/calabrese, cauliflower and carrots.

A water dispersible granule formulation containing 250 g/kg (25.0% w/w) trifloxystrobin and 500 g/kg (50.0% w/w) tebuconazole.

For Professional use only.

SAFETY PRECAUTIONS

Operator Protection
Wear suitable protective clothing (coveralls) and suitable protective gloves when handling the concentrate.
Wear suitable protective clothing (coveralls) when applying the product.
Wear suitable protective clothing (coveralls) and suitable protective gloves when in contact with contaminated surfaces.
Wash any contamination from eyes immediately. If you feel unwell, seek medical advice (show label where possible).
Wash hands and exposed skin before meals and after work.
Do not apply by hand held equipment.

Environmental Protection
Do not contaminate water with the product or its container (Do not clean application equipment near surface water / Avoid contamination via drains from farmyards and roads.)
Use appropriate containment to avoid environmental contamination.
To protect aquatic organisms respect an unsprayed buffer zone of 30m* to surface waters.
To reduce this buffer zone please refer to PRCD Guidance – STRIPES (Surface water Tool for Reducing the Impact of Pesticides in the Environment).

To avoid risks to human health and the environment, comply with the instructions for use.
Contains trifloxystrobin. May produce an allergic reaction.

Warning
May cause an allergic skin reaction.
Causes serious eye irritation.
Suspected of damaging the unborn child.
Very toxic to aquatic life with long lasting effects.
Wear protective gloves/protective clothing/eye protection/face protection.

If exposed or concerned: Call a POISON CENTER or doctor/physician.
Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for triple rinsed empty clean containers which can be disposed of as non hazardous waste.

To avoid risks to human health and the environment, comply with the instructions for use.
Contains trifloxystrobin. May produce an allergic reaction.

PCS No. 04642
Fungicide

Broad spectrum systemic fungicide with protectant and curative properties for use on Brussels sprouts, cabbage, broccolocálabrese, cauliflower and carrots.

Water dispersible granule formulation containing 250 g/kg (25.0% w/w) trifloxystrobin and 500 g/kg (50.0% w/w) tebuconazole.

For use only as an agricultural fungicide.

For best disease control and yield benefit Nativo 75WG should be applied at an early stage of disease development, before infection spreads to new crop growth.

Nativo 75WG is recommended for control of a wide range of diseases on Brussels sprouts, cabbage, broccoli/calabrese, cauliflower and carrots.

DIRECTIONS FOR USE

Add the required quantity of Nativo 75WG to the half-filled spray tank with the agitation system in operation and then fill to the required level. Continue agitation at all times during spraying and stoppages until the tank is completely empty.

As part of a disease resistance management strategy, Nativo 75WG should be applied at an early stage of disease development, before infection spreads to new crop growth.

RESISTANCE MANAGEMENT

Nativo 75WG contains trifloxystrobin, a member of the QoI cross-resistance group. Use Nativo 75WG as part of an Integrated Crop Management (ICM) strategy incorporating other methods of control including where appropriate other fungicides with a different mode of action. Do not spray more than two applications of Nativo 75WG to Brussels sprouts, cabbage, broccoli, cauliflower and cauliflower and more than three applications to carrots.

For best in accordance with FRAC guidelines for pre-mix QoI fungicides the number of applications of QoI containing products should be no more than 50% of the total number that would be applied in the absence of resistance to QoI fungicides.

CROP SPECIFIC INFORMATION

Brussels sprouts, cabbage, broccoli, cauliflower and carrots

Dark leaf spot (Alternaria brassicae & A. frigida), downy mildew (Pseudoperonospora brassicacearum) and black spot (Uromyces brassicae).

Spray immediately after mixing.

Rinse container thoroughly by using an integrated pressure rinsing device or high pressure wash.

This material and its container must be disposed of in a safe way.

This product is intended for professional use. To access the product information for this product scan the code or use the link below:
