RISK & SAFETY INFORMATION

For advice on medical emergencies, fires or major spills telephone The National Poisons Information Centre, Beaumont Hospital on 01 809 2166 or 01 837 9964.

WARNING

Causes serious eye irritation.
Causes skin irritation.

- Wear protective gloves/protective clothing/eye protection/face protection.
- IF ON SKIN: Wash with plenty of water.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- Immediately call a POISON CENTER or doctor/physician.
- If skin irritation occurs: Get medical advice/attention.
- If eye irritation occurs: Get medical advice/attention.
- Take off contaminated clothing and wash before reuse.
- Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for triple rinsed empty clean containers which can be disposed of as non-hazardous waste.

To avoid risks to human health and the environment, comply with the instructions for use.

PCS No 05603

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work.

LNEWW001FROI v2

A soluble concentrate formulation containing 240 g/l acetic acid.

IMPORTANT INFORMATION FOR USE ONLY AS A PROFESSIONAL HERBICIDE AND MOSSKILLER

Hard surfaces, natural surfaces not intended to bear vegetation, permeable surfaces overlying soil.

Maximum individual dose: 25ml product per m²

Maximum number of treatments: 6 per year

Other specific restrictions: A minimum interval of 7 days must be observed between applications.

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

SAFETY PRECAUTIONS

Operator protection:

Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment.

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the concentrate.

However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.

Avoid contact with eyes.

Do not breathe spray/FUMES.

WHEN USING DO NOT EAT, DRINK OR SMOKE. WASH HANDS before eating and drinking and after work.

Use only in well-ventilated areas.

Environmental protection:

Do not apply where rainfall is expected within 6 hours of application.

Do not contaminate water with the product or its container (Do not clean application equipment near surface water/ Avoid contamination via drains from farmyards and roads).

To protect aquatic organisms, respect an unsprayed buffer zone to surface water bodies in line with LERAP requirements.

DO NOT ALLOW DIRECT SPRAY from hand-held sprayers to fall within 1m of the top of the bank of a static or flowing water body. Aim spray away from water.

RISK TO NON-TARGET INSECTS OR OTHER ARTHROPODS.

Applications must not be made via tractor mounted horizontal boom sprayers. See Directions for use.

Storage and disposal: KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place. Keep out of the reach of children.

Keep away from food, drink, and animal feedingstuffs.

This material and its container must be disposed of in a safe way.

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

NEW-WAY WEED SPRAY is a non-selective weed and moss killer, active against most soft plant tissue with which it comes in contact. Weeds and moss are controlled by covering their foliage completely and evenly with spray. Soon after spraying, the foliage of treated weeds and moss begins to wither and die. Plant roots are not killed, and new foliage may grow, particularly from the roots of perennial weeds. Annual weeds with small roots and moss may die back completely, but re-treatment will usually be necessary, especially to keep down perennial weeds. As for weeds, best results are achieved against tender, small weeds less than 10cm high. Ideally spray in spring and repeat as necessary over the growing season. Minimise drift from the target area.

Areas of Use:

NEW-WAY WEED SPRAY may be used to control weed or moss growth in a wide variety of situations, such as in parks, amenity areas and churchyards, on pathways, around domestic, industrial, and public buildings, and similar situations. Keep spray off vegetables, flowers, shrubs, and lawns.

Application: Apply as a COARSE spray so that the moss or the weed leaves and stems are fully wetted but before the point at which spray solution drips from the leaves. Repeat against surviving weeds after a few days, if necessary, when fresh growth is seen.

Large or perennial weeds may re-grow. Persistent weeds may require repeated treatments once new growth appears. Mosses, liverworts and algae may be controlled for up to 4 weeks but repeat treatment may be required.

Avoid contact by spray and spray drift onto desired vegetation. Do not use on lawns.

Mixing and spraying: Mix 1 volume of NEW-WAY WEED SPRAY with 3 volumes of clean water, e.g. for a 16 litre knapsack sprayer mix 4 litres of NEW-WAY WEED SPRAY with 12 litres of water.

1. Half fill the spray tank with clean water.
2. Add the required amount of NEW-WAY WEED SPRAY.
3. Fill the tank with more clean water to the required level.
4. Agitate thoroughly before use.

Weather: Apply NEW-WAY WEED SPRAY on a dry day when rain is not expected. Rain after spraying may wash spray away from the leaves, leading to a poor result.

Apply this product carefully. Ensure spraying takes place only when weeds are actively growing (normally March to October) and is confined only to visible weeds, including those in the 30cm swath covering the kerb edge and road gully – do not overspray drains. For best results, apply in warm, dry conditions when weeds are young and actively growing, usually during spring or early summer.

After spraying: Wash out sprayer after use. Keep people and animals off dense patches of weeds or moss until the spray has dried, after just 15 – 20 minutes. However, this is not necessary for treated areas containing only occasional, low, or prostrate weeds or moss such as may be found on pathways. Use of NEW-WAY WEED SPRAY may cause some surfaces to become slippery for a short time after application.

Subsequent planting: There are no residual effects of NEW-WAY WEED SPRAY in the soil. Sowing or planting may be undertaken as soon as the moss or the weeds have died.

Care of equipment: Wash the sprayer and utensils, both inside and outside, thoroughly after use and allow to dry.
