Crop	Max. individual dose	Max. number of applications	Max. total dose	Minimum interval between applications	Latest time of application	Target
Protected crops of: tomato, cucumber, aubergine & courgette.	900 ml/ha *	2 per crop	1.8 L/ha	7 days	1 day before harvest	Powdery mildew

* Product should be used with suitable wetting agent.

Other specific restrictions:

- (1) To avoid risks to human health & the environment comply with the terms of this approval in conjunction with the directions for use on the product label.
- (2) Use in a water volume of 200 to 1000L except when applying by handheld sprayer where a maximum concentration of 90ml product per 100L water is permitted
- (3) For any individual crop the maximum total dose refers to the total dose of any product containing the same active ingredient.
- (4) Application by tractor mounted/trailed/air assisted/ gantry glasshouse or handheld sprayer only.
- (5) Post application do not allow unprotected persons to enter treated areas until the crop is completely dry & has been well ventilated.
- (6) For environmental information refer to the product label.
- (7) This approval extends to professional use only.
- (8) For operator protection refer to the product label in conjunction with the specific restrictions above.
- (9) Adverse effects: Approval holders must immediately submit any new information on the potentially dangerous effects of a product or residues of an active substance contained in a product, on human or animal health, or the environment.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

Advisory information:

This approval relates to the use of Frupica SC as a horticultural fungicide for the control of powdery mildew on the above mentioned crops and situations.

Resistance Management:

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical groups or alternative control measures should be included in the planned anti-resistance strategy. This product should be used in conjunction with other fungicides from different cross-resistant groups [different mode of action, FRAC group] with satisfactory efficacy against the target.

Frupica SC is an anilino-pyrimidine FRAC Group 9 fungicide. Do not use more than two applications of Frupica SC or other anilino-pyrimidine containing products per crop.

IMPORTANT PLEASE NOTE:

Prior to the use of this product, growers should take advice from their crop advisors particularly in relation to the use of this product within an integrated crop management system of production.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.
