

EXTENSION OF AUTHORISATION FOR MINOR USES (EAMU)

INSTRUCTIONS FOR USE

PPP: Insyst (PCS No. 03249)

CROPS:

Field grown Brussel Sprout

This approval provides for the use of the product **Insyst (PCS No. 03249)** in respect of, the crops and situations as listed above, which are extra to those specified on the product label.

The conditions of application outlined below are statutory. They must be complied with when availing of this extension for minor uses.

The instructions provided in this extension for minor uses must be used in conjunction with information provided on the approved product label.

Failure to abide by the conditions of approval specified below or on the product label may constitute a breach of the product approval.

Reference Date: 04.12.25. [Includes latest changes. This version should be used until updated]

Product name: Insyst
Active Substance: (20%w/w Acetamiprid)
Formulation: Water soluble powder.
Authorisation Holder: Nisso Chemical Europe GmbH
Marketing Company: Certis Belchim BV
PCS No: 03249.
User type/Function: Professional Use / Insecticide.
Application:

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

<i>Crop:</i>	<i>Target:</i>	<i>Maximum individual dose:</i>	<i>Maximum number of applications:</i>	<i>Pre harvest interval:</i>
Field Brussel Sprout	Cabbage mealy aphid & Whitefly	250g product ha	1	21 days

Other specific restrictions:

- (1) To avoid risks to human health & the environment comply with the terms of this approval in conjunction with the directions for use on the product label.
- (2) For any individual crop the maximum total dose refers to the total dose of any product containing the same active ingredient.
- (3) Application by tractor mounted/trailed horizontal boom sprayer or knapsack.
- (4) Post application, do not allow unprotected persons to enter treated areas until the crop is completely dry & has been well ventilated.
- (5) For environmental information refer to the product label but specifically: To protect aquatic organisms, respect an unsprayed buffer zone of 5m to surface water bodies
- (6) This approval extends to professional use only.
- (7) For operator protection refer to the product label in conjunction with the specific restrictions above.
- (8) Adverse effects: Approval holders must immediately submit any new information on the potentially dangerous effects of a product or residues of an active substance contained in a product, on human or animal health, or the environment.

Advisory information:

This approval relates to use of “Insyst” as a horticultural insecticide for the control of the cabbage mealy aphid *Brevicoryne brassicae* & white fly. Applications should be made using conventional hydraulic sprayers or hand held applicators using a minimum of 300 litres of water per ha.

Resistance Management:

For resistance purposes *Acetamiprid* is classed within the group: Neonicotinoid IRAC group 4A. Use no more than two applications of any neonicotinoid insecticide on any crop.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating insecticides with different modes of action is a recognised anti-resistance strategy and Insyst should always be used in conjunction with other insecticides with a different mode of action. This includes consideration of sequences involving seed treatments followed by foliar sprays.

IMPORTANT PLEASE NOTE:

Prior to the use of this product, growers should take advice from their crop advisors particularly in relation to the use of this product within an integrated crop management system of production.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.
