- (8) This approval extends to professional use only.
- (9) For operator protection refer to the product label in conjunction with the specific restrictions above.
- (10) Adverse effects: Approval holders must immediately submit any new information on the potentially dangerous effects of a product or residues of an active substance contained in a product, on human or animal health, or the environment.

## Advisory information:

This approval relates to the use of SL 567A as a horticultural fungicide for use on the crops and situations listed above.

# Resistance Management:

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical groups or alternative control measures should be included in the planned anti-resistance strategy.

SL 567A should be used on a preventive and not curative or eradicative basis Application of SL567A should be made with due regard to the FRAC guidelines SL 567A contains Metalaxyl-m (a phenylamide fungicide), a group 4 fungicide.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

#### **IMPORTANT PLEASE NOTE:**

Prior to the use of this product, growers should take advice from their crop advisors particularly in relation to the use of this product within an integrated crop management system of production.
