Carrots, parsnips, celeriac, horseradish, Jerusalem artichoke, parsley root, radish, salsify, turnip and swede	0.14 kg/ha	2 per crop	0.28 kg/ha	14 days	21 days before harvest	Aphid

*Other specific restrictions:*

- (1) To avoid risks to human health & the environment comply with the terms of this approval in conjunction with the directions for use on the product label.
- (2) For any individual crop the maximum total dose refers to the total dose of any product containing the same active ingredient.

***There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.***

- (3) Post application no unprotected person should enter the treated area until the application had dried.
- (4) This approval extends to professional use only.
- (5) Application may be made via tractor mounted/trailed boom sprayer only, orchard sprayer.
- (6) DANGEROUS TO BEES. To protect bees and pollinating insects do not apply to crop plants when in flower. Do not use where bees are actively foraging. Do not apply when flowering weeds are present.
- (7) For operator protection refer to the product label.
- (8) Adverse effects: Approval holders must immediately submit any new information on the potentially dangerous effects of a product or residues of an active substance contained in a product, on human or animal health, or the environment.

*Advisory information:*

This approval relates to use of Teppeki as a horticultural insecticide for the control of a range of aphid species on the crops and situations listed above.

*Resistance Management:*

Teppeki containing *Flonicamid* is classed as follows: IRAC group 29

Use as part of an Integrated Resistance Management strategy. Rotate the use between insecticides with different modes of action (IRAC groups) showing good efficacy on the target.

*IMPORTANT PLEASE NOTE:*

Prior to the use of this product, growers should take advice from their crop advisors particularly in relation to the use of this product within an integrated crop management system of production.
